

3D Visualization

World Leaders in Large-Scale Visualization.

Since inception, Charone GIS & Drafting has led the industry in large-scale visualization. In 2004, Autodesk awarded the **Autodesk Innovation Award for Advances in Geospatial Technology** to Charone GIS & Drafting. Since 2004, we have continued to lead by developing ever more sophisticated and powerful methods for communicating high-volumes of data in a clear, concise and easy-to-understand manner.

Whether you're completing Visual Impact Assessments (VIAs), communicating proposed designs, or developing breath-taking promotional imagery, Charone GIS & Drafting will provide a level of realism that can be found nowhere else.

Full GIS/RS/CAD Compatibility.

When there's no room for "... it *looks* right ...", you need the accuracy and precision of technical GIS & CAD systems. Our proprietary methods for data visualization integrate your firm's data with our 3D systems and the result is nothing short of stunning.

- Versatile Data Overlays
- Accurate Vegetation (Grasses, Hundreds of Tree Species, Shrubs)
- Waterbodies (Complete with Bathymetry)
- Detailed Topography
- Site Structures and Buildings

Our systems support animated terrain & data, creating a truly dynamic presentation medium that brings incredible value to the decision and communication processes.

Charone GIS & Drafting is an award-winning geospatial firm specializing in mapping, cartographic and drafting services for environmental engineering firms, the petroleum and mining sectors, real estate and municipal, provincial and federal governments.
